DETAILED ACTION

1. Claims 1 and 5-9 are rejected under 35 U.S.C. 102(a) as being anticipated by Huber et al '003.

Note motor 20, planetary gearing 50, 55 and 60, lift 40, roller 30, first brake 90 and second brake 70.

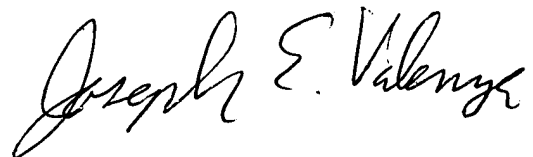

2. Claims 2 and 3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Huber et al '003.

With regard to claim 2, the design of the controls(electrical, mechanical, etc.) for the brakes are matters of design choice over the teachings in Huber et al because they are functional equivalents. With regard to claim 3, the need for a brake gear with the first brake is a matter of choice since the first brake in Huber et al is a functional equivalent design.

3. Claim 4 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Paauwe et al is pertinent.

5. Any inquiry concerning this communication should be directed to Joseph E. Valenza at telephone number (703) 308-2577. Amendments may be faxed to 703-305-7687. My normal workweek is Monday through Thursday.
